This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today’s history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present
has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is ‘just history’. The contributions to this book unveil how teachers, backgrounds the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

California myWorld Interactive encourages students to explore their worlds, expand their thinking, and engage with the California History-Social Science Standards and Framework. The curriculum is flexible and easily adapts to every classroom. The Cambridge World History is an authoritative new overview of the dynamic field of world history. It covers the whole of human history, not simply history since the development of written records, in an expanded time frame that represents the latest thinking in world and global history. With over two hundred essays, it is the most comprehensive account yet of the human past, and it draws on a broad international pool of leading academics from a wide range of scholarly disciplines. Reflecting the increasing awareness that world history can be examined through many different approaches and at varying geographic and chronological scales, each volume offers regional, topical, and comparative essays alongside case studies that provide depth of coverage to go with the breadth of vision that is the distinguishing characteristic of world history.

How right-wing political entrepreneurs around the world use religious offense—both given and taken—to mobilize supporters and marginalize opponents. In the United States, elements of the religious right fuel fears of an existential Islamic threat, spreading anti-Muslim rhetoric into mainstream politics. In Indonesia, Muslim absolutists urge suppression of churches and minority sects, fostering a climate of rising intolerance. In India, Narendra Modi’s radical supporters instigate communal riots and academic censorship in pursuit of their Hindu-nationalist vision.

Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous. But in Hate Spin, Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents. Right-wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics, exploiting democratic space to promote agendas that undermine democratic values. George calls this strategy “hate spin”—a double-sided technique that combines hate speech (incitement through vilification) with manufactured offense-taking (the performing of righteous indignation). It is deployed in societies as diverse as Buddhist Myanmar and Orthodox Christian Russia. George looks at the world’s three largest democracies, where intolerant groups within India’s Hindu right, America’s Christian right, and Indonesia’s Muslim right are all accomplished users of hate spin.

He also shows how the Internet and Google have opened up new opportunities for cross-border hate spin. George argues that governments must protect vulnerable communities by prohibiting calls to action that lead directly to discrimination and violence. But laws that try to protect believers’ feelings against all provocative expression invariably backfire. They arm hate agents’ offense-taking campaigns with legal ammunition. Anti-discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult.

A textbook history of the world focusing on the development of various civilizations.

This book makes a unique and timely contribution to world/global historical studies and related fields. It places essential world historical frameworks by top scholars in the field today in clear, direct relation to and conversation with one other, offering them opportunity to enrich, elucidate and, at times, challenge one another. It thereby aims to: (1) offer world historians opportunity to critically reflect upon and refine their essential interpretational frameworks, (2) facilitate more effective and nuanced teaching and learning in and beyond the classroom, (3) provide accessible world historical contexts for specialized areas of historical as well as other fields of research in the humanities, social sciences and sciences, and (4) promote comparative historiographical critique which (a) helps identify continuing research questions for the field of world history in particular, as well as (b) further global peace and dialogue in relation to varying views of our ever-increasingly interconnected, interdependent, multicultural, and globalized world and its shared though diverse and sometimes contested history.

This volume examines the teaching of Jewishness within the context of medieval England. It covers a wide array of academic disciplines and addresses a multitude of primary sources, including medieval English manuscripts, law codes, philosophy, art, and literature, in explicating how the Jew-as-Other was formed. Chapters are devoted to the teaching of the complexities of medieval Jewish experiences in the modern classroom. Jews in Medieval England: Teaching Representations of the Other also grounds medieval conceptions of the Other within the contemporary world where we continue to confront the problematic attitudes directed toward alleged social outcasts.

In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students’ thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world.

Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.
